

Muhammad Raihan Fauzi

muhammad.raihan.fauzi@gmail.com

I am a fresh graduate in Informatics from Telkom University. I am a passionate Software Engineer with a strong academic background in Informatics. Proficient in Kotlin, React Native, Flutter, and Javascript, I have experience developing various mobile and web application. I am actively seeking a challenging position where I can apply my skills and knowledge to make a positive impact. Highly motivated and results-oriented, I possess a strong work ethic.

EDUCATION

Mentee of Digistar Class by Digistar Club Telkom Indonesia – Jarak Jauh
Back-End Learning Path

August - September 2024

BANGKIT ACADEMY – Jarak Jauh
Mobile Development Learning Path

February - July 2023

TELKOM UNIVERSITY – Bandung
Faculty of Informatics, Bachelor's degree, Informatics
GPA 3.73

2020 - 2024

SKILL AND COMPETENCIES

- | | | |
|------------------|--------------|--------------|
| • Kotlin | • CSS | • Trello |
| • React Native | • UI/UX | • Jira |
| • Java | • Figma | • Scrum |
| • Flutter | • Python | • Postman |
| • Dart | • OOP | • Firebase |
| • Android Studio | • Golang | • Team Work |
| • HTML | • Javascript | • Leadership |

EXPERIENCE

PT Telekomunikasi Indonesia

April - September 2024

Mobile Engineer Intern

- Become part of Telkom's DDB internship program through the Magenta to participate in real-world project development within Telkom's Digital Business Directorate (DDB). In this internship I was placed on the Evomo project as a Mobile Engineer Intern by developing mobile applications with Flutter and Kotlin.

Telkom University

October 2023 - January 2024

Software Engineering : Implementation and Design Lecturer Assistant

- Provide guidance to 35+ students on Software engineering in the software implementation and design phase in creating mobile applications and websites, as well as the creation of documents ranging from SKPL, DPPL, DUPL, to User Manual. Assess all assignments from weekly assignments to project assignments.

PT Telekomunikasi Indonesia

August - December 2023

Mobile Engineer Intern

- Become part of Telkom's DDB internship program through the Merdeka Campus (MSIB 5) to participate in real-world project development within Telkom's Digital Business Directorate (DDB). In this internship I was placed on the PaDi UMKM project as a Mobile Engineer Intern by developing mobile applications with React Native.

Mobile Innovation Lab of Telkom University

AWARDS & PROJECTS

- I published my final project on computer vision in IEEE Xplore through the 7th International Conference on Data Science (ICoDSA) - I participated in the 7th ICoDSA as an author and presenter of the paper titled "Food Type Detection Using the Convolutional Neural Network Method for Calorie Counter Applications." After the conference, the paper was published in IEEE Xplore, further broadening its reach and impact within the scientific community.
- 3rd Place in ITFest Hackathon 2024 - DevLabs is an all-in-one platform designed to facilitate seamless collaboration between clients, architects, and builders throughout every stage of a project. The mobile application, built using Kotlin, follows the MVVM architecture (Model-View-ViewModel) to enhance code structure and maintainability.
- 3rd Place in JBC Business Plan Competition 2022 - Develop DevLabs business plan, a platform that will provide convenience in real estate development, from consulting with architects to monitoring progress that can all be done in one app
- The 5 Best Project Plans Award in Z Future Leader 2021 - Make project plans for Gen-Z so they can compete and change Indonesia for the better and get mentorship from Manik Margana Mahendra(Ex-President UI 2019), Dinno Ardiansyah(Ex-President Trisakti 2019), and Sultan Rivandi(Ex-President of UIN Syarif Hidayatullah 2019)
- Develop Fitnessist - Fitnessist is a revolutionary fitness application. This is an application made for my final project and my team at Bangkit Academy. This app has its own Backend API and machine learning model. The machine learning model created is to detect food calories from the photos taken in the application and then sent to the backend
- Develop Warung Tani - A cross-platform marketplace platform that provides online transactions between users directly with the farmers with cheaper prices compared to other markets
- Develop Rentify - Rentify is a web-based application that is used to book sports venues, ballrooms, and concert venues

LICENCES & CERTIFICATIONS

Flutter & Dart - The Complete Guide [2024 Edition] 2024

Academind - UC-2b68d8c3-db2d-4644-852a-9d8d798a3cdc

Complete React Native in 2023: Zero to Mastery (with Hooks) 2023

Zero To Mastery Academy - UC-2f84bb69-81f8-4cd9-b01c-656fd99bd4a5

Belajar Pengembangan Aplikasi Android Intermediate 2023

Dicoding - QLZ9Q462DZ5D

Belajar Prinsip Pemrograman SOLID 2023

Dicoding - L4PQG358VZO1

Belajar Membuat Aplikasi Android dengan Jetpack Compose 2023

Dicoding - 81P23835YXOY

Belajar Fundamental Aplikasi Android 2023

Dicoding - 0LZ09D690Z65

Intensive Bootcamp Laravel Web Development 2023

SanberCode - 39594/481/SNBR/BOOTCAMP/VIII/2023
